

PAR-Q & YOU

PHYSICAL ACTIVITY READINESS QUESTIONNAIRE

Regular physical activity is fun and healthy, and increasingly more people are starting to become more active every day. If you are planning to become much more physically active than you are now, start by answering the seven questions below.

If you are between the ages of 15 and 69, the PAR-Q will tell you if you should check with your doctor before you start.

If you are over the age of 69, and you are not used to being very active, check with your doctor.

Common sense is your best guide when you answer these questions.

PLEASE READ THE QUESTIONS CAREFULLY AND ANSWER EACH ONE HONESTLY:

1. Has your doctor ever said that you have a heart condition and that you should only do physical activity recommended by a doctor?
2. Do you feel pain in your chest when you do physical activity?
3. In the past month, have you had chest pain when you were not doing physical activity?
4. Do you lose your balance because of dizziness or do you ever lost consciousness?
5. Do you have a bone or joint problem (for example, back knee or hip) that could be made worse by a change in your physical activity?
6. Is your doctor currently prescribing drugs (for example, water pills) for your blood pressure or heart condition?
7. Do you know of any other reason why you should not do physical activity?

IF YOU ANSWERED

YES (TO ONE OR MORE QUESTIONS)

- Talk with your doctor by phone or in person **BEFORE** you start becoming more physically active or **BEFORE** you have a fitness appraisal.
- Tell your doctor about the PAR-Q and which questions you answered **YES**.
- You may be able to do any activity you want – as long as you start slowly and build up gradually. Or, you may need to restrict your activities to those which are safe for you. Talk with your doctor about the kinds of activities you wish to participate in and follow his/her advice.
- Find out which community programs are safe and helpful for you.

NO (TO ALL OF THE QUESTIONS)

- If you answered **NO** honestly to **all** PAR-Q questions, you can be reasonably sure that you can:
- Start becoming much more physically active – begin slowly and build up gradually. This is the safest and easiest way to go.
- Take part in a fitness appraisal – this is an excellent way to determine your basic fitness so that you can plan the best way for you to live actively. It is also highly recommended that you have your blood pressure evaluated. If your reading is over 144/94, talk with your doctor before you start becoming much more physically active.

DELAY BECOMING MUCH MORE ACTIVE IF:

- You are not feeling well because of a temporary illness such as a cold or fever – wait until you feel better.
- You are or may be pregnant – talk to your doctor before you start becoming more active.

PLEASE NOTE If your health changes so that you then answer to **YES** to any of the above questions, tell your fitness or health professional. Ask whether you should change your physical activity plan.

INFORMED USE OF THE PAR-Q Directorate of Family and Morale, Welfare and Recreation and its employees assume no liability for patrons who undertake physical activity, and if in doubt after completing this questionnaire, consult your doctor prior to physical activity.
