Yeidang Lake suspension Bridge

Open in April 06, 2019, Yedangho Suspension Bridge is the longest suspension bridge in Korea with the length of 402 meters. With a Slow Lake Road open in October 2019, the walk from the suspension bridge to the road offers a beautiful scenery.

Yesan Traditional Market

The traditional market located at Yesan was finally reopened, renewed and polished, with new items and high tech facilities. The main leader that contributed to this result was Baek Jong Won, a famous chef influencer. Thanks to his investment of over 3 thousand million won, many retailers who were at the brink of bankruptcy were saved.

Baek Jong Won used his experience in his career as a chef for over 25 years, not just to create new menus such as apple korean pancake, green

onion oil noodles, and LA cow ribs, but also to renew shops' names and interior designs. The names originated from village names in Yesan, such as Bongsan Udon or Ogamyeon Snack Bar, and are said to be used to promote the county's society. The result of Baek Jong Won's labor shined off by reaching 15,000 visitors on the first day, and it is now reaching 230,000 visitors per month.)

Cheongsan Arboretum is home to over 200 different kinds of wildflowers, trees, and water plants such as lotuses and water lilies. Theme gardens and walking trails have over 600 types of trees. Opened in 1990, the garden has the most water plants in the nation.
